

# One Drop of Water

You can find water everywhere  
one drop of water, one drop of water  
Way down in the ground or high up in the air  
one drop of water, one drop of water  
It's frozen in the ice or rolling in the sea  
one drop of water, one drop of water  
There is water in you and me  
one drop of water, one drop of water

Water passes through all time untold  
one drop of water, one drop of water  
It never goes away so it's very very old  
one drop of water, one drop of water  
It may change but it never goes away  
one drop of water, one drop of water  
Its ancient water that we drink today  
one drop of water, one drop of water

## CHORUS

Water is a precious thing, oh yeah  
Life oh life is what it brings

Think of all the places on little drop has been  
one drop of water, one drop of water  
It's gone up and down out and in  
one drop of water, one drop of water  
It made a quiet drip to the rocks below  
one drop of water, one drop of water  
Then a powerful rush when others joined the flow  
one drop of water, one drop of water

Maybe it was the tear where a princess wept  
one drop of water, one drop of water  
Or it once was in a puddle where a dinosaur stepped  
one drop of water, one drop of water  
Was it in the Nile when it first began to run  
one drop of water, one drop of water  
Or it once was in the bath of George Washington  
one drop of water, one drop of water

Water can't tell you its tale of glory  
one drop of water, one drop of water  
So you must tell this miraculous story  
one drop of water, one drop of water  
It doesn't matter where the journey begins  
one drop of water, one drop of water  
It travels through all time and space and never ends  
one drop of water, one drop of water
