

Zoo in the Sky

Go outside on a clear, dark night. Using the star map in the book (bring your **flashlight** to see your star chart) look up into the night sky to see how many star animals you can locate or make up your own! (Wear your **Imagination Butterfly Band!**) Use your **compass** to pinpoint their location. Look at the stars & moon through your **binoculars**.

JOURNAL IDEA: draw your favorite sky zoo animal.
