

Habitat Habitat

At the river side the crayfish hide
While the fish jump high to catch a mayfly in that Habitat, habitat
In the pond what can be found the reeds grow all around
Swimming pollywogs turn into jumping frogs in that Habitat, habitat
Now underneath the ground the roots go pushing down
And the mole lives there too it finds an earthworm to chew in that Habitat, habitat
Lift up a log nice and slow, a beetle crawls down below
In decay that's where it feeds watch out for centipede in that Habitat, habitat

Chorus

Habitat, habitat, habitat there
Habitat, habitat is everywhere
That's the reason that live can live
Food water shelter is what it gives
From the little micro clime to the big biome
Habitat, habitat, *Habitat's a hom
With room to roam *Habitat's a home (2X)

On a woodland trail there are bushy grey tails
Into the trees they run away as bobcat stalks its prey in that Habitat, habitat
Out of the cave in the night a million bats are taking flight
When morning sun comes around they're sleeping upside down in that Habitat, habitat
The prairie ripples in the breeze, field mice they are eating seeds
The snake slides by away from hawk's sharp eye in that Habitat, habitat
Habitat is what we need so let's do a good deed
Keep it wild and free protect diversity in that Habitat, habitat

(Chorus)

Coda:

Prairie, pond and underground
Log, cave, woodland, river
To habitat all life is bound
And that's why life can live here (repeat)

BANANA SLUG
STRING BAND
