

LEAF WIND CHIME

The materials required to complete this craft are included in your provided **STUDENT KIT**: stick, air dry clay and string.

Students will need to find leaves to press into the clay. The student can decorate the dried leaf impressions with markers or outdoor friendly paints. Be as creative as you like. Try adding beads or any other items onto the chime. Be sure to share your finished craft on the **FLIPGRID Challenge: Share Your Wind Chime!**

INSTRUCTIONS

1. Go out into your yard and collect various leaves.
2. Roll out the air-dry clay.
3. Press each of your leaves into the clay.
4. Cut around the leaves and poke a hole into the top of the piece using a pencil.
5. Allow the clay to dry for 24 hours.
6. Once the clay is dry, you can paint or color with crayons.
7. Tie string to each end of the stick making a long triangular hanging hook.
8. Tie the additional strings to the stick so they are hanging downward.
9. Attach the leaf ornaments onto the strings. They can be the same or differing lengths.
10. Hang up and watch the leaves give a voice to the wind!
11. Share your chime on the **FLIPGRID Challenge: Share Your Wind Chime.**
