

We would like you to set up a test session with us before your first Nature LIVE! session so we can test links, visual, and audio within your classroom.

I'M A TREE PROGRAM OVERVIEW:

This program is a series of four sessions offered individually, designed for Kindergartners to discover through the topic of trees and the animals that interact with them how the weather plays a part in their behaviors. Also comparisons will be done so the kids will know that all trees have the same parts, but they are all different. Not to mention the characteristics of them produce special gifts for us.

(Geography K.6, ESS.K.1, LS.K.1, LS.K.2, PS.K.1, PS.K.2)

SESSION 1: HOW TREES PREP FOR WINTER (OFFERED IN NOVEMBER-DECEMBER)

During this 20 minute online adventure, your naturalists will lead the session from one of our many Miami County Parks! With Winter fast approaching it is time to step outside and follow our naturalist into the woods to see what the trees do in the wintertime. These living things may not look so living in the Winter, but this behavior influences their survival. Students will also come prepared with a leaf that they have collected off of the ground, so they can compare with the naturalist and describe the different properties leaves withhold. This session also has a tailored review quiz for your students and the Heat & Pressure SCIENCE JOURNEYS material will support some of the same standards. Click the session title above to book your session with a naturalist!

SESSION 2: HOW ANIMALS PREP FOR WINTER (OFFERED IN DECEMBER)

During this 20 minute online adventure, your naturalists will lead the session from one of our many Miami County Parks! This time as your students join our naturalist in the woods, animals are the focus. Will these poor beasts survive the winter? With the help of trees and their special behaviors, students will learn from the animals themselves what they need to do to survive the winter. This session also has a tailored review quiz for your students and the Heat & Pressure SCIENCE JOURNEYS material will support some of the same standards. Click the session title above to book your session with a naturalist!

SESSION 3: TREES AND THEIR NATURAL GIFTS (OFFERED IN FEBRUARY)

During this 20 minute online adventure, your naturalists will lead the session from Maple Ridge Reserve! Trees give us many gifts and this adventure will focus on all of the natural gifts trees can give including maple syrup. The students will walk through the syrup making process with a talking maple tree. This session also has a tailored review quiz for your students and the Heat & Pressure SCIENCE JOURNEYS material will support some of the same standards. SESSION 4: TREES AND THEIR MAN-MADE GIFTS (OFFERED IN MARCH)

During this 20 minute online adventure, your naturalists will lead the session from one of our many Miami County Parks! The gifts trees give us naturally is special, but we use trees to make many man-made gifts as well. On this adventure your naturalist will take you into the world of trees to notice that everywhere you look is more evidence of a tree gift. Meet the beaver who builds its home out of wood just like we do. This session also has a tailored review quiz for your students and the Heat & Pressure SCIENCE JOURNEYS material will support some of the same standards.
