

An **ant** can lift 20 times its own weight - 50 times their size! That would be like a human lifting a car!

In the fall, **Monarch Butterflies** migrate (fly) to Mexico and California, a journey of over 1,000 miles! They have a built-in compass to help them find their way!

**Honeybees** have to visit about 2 million flowers to collect enough nectar to make one pound of honey!

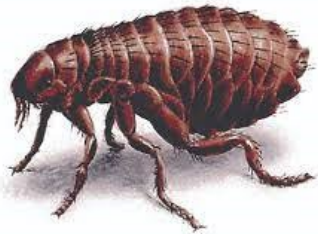

The male **Stag Beetles'** scary looking jaws are only used to fight other males to win over a female.

**Grasshoppers** can jump 20 times the length of their bodies. If humans could jump as far as grasshoppers do, then we could leap more than the length of a football field!

One **Ladybug** can eat up to 5,000 insects in its Lifetime!

A **flea** can pull 160,000 times their own weight, which is like a human pulling 2,679 double-decker buses!

Some **Cicadas** can make sounds nearly 120 decibels loud, which is as loud as a rock concert!

A **Bombardier Beetle** probably got its name because it can make an EXPLOSIVE liquid spray out its rear end! The liquid can reach up to 212°F!

Water Striders are able to walk on the surface of water!

**Firefly** eggs also glow and flash!

A **Monarch caterpillar** will grow 2,000 times their original size in about 2 weeks. If a human baby did the same thing, it could weigh 12,000 pounds!

**Paper Wasps** are pollinators because they eat nectar, but they also eat other insects!

A **Praying Mantis** is the ONLY insect that can turn its head from side to side without moving the rest of its body, which allows it to be a sneaky hunter!

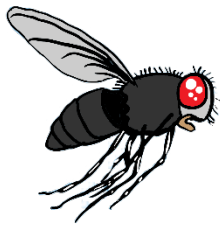

**Japanese Beetles** can fly as far as 5 miles, but are poor fliers and can be caught easily.

**Dragonflies** can fly straight up and down and hover like a helicopter, which is good because they ONLY eat while flying!

The **Mosquito's** wings beat about 1000 times per second and create the insect's telltale buzzing sound.

When a **House Fly** lands on a meal, it uses its FEET to taste!

The **Walking Stick** can regrow lost limbs!

The **Stink Bug's** stink comes from holes in its abdomen.
