

## **NO BONES NATURE LIVE! INFORMATION**

We would like you to set up a test session with us before your first Nature LIVE! session so we can test links, visual, and audio within your classroom.

### **NO BONES PROGRAM OVERVIEW:**

This program is designed to explore the parts of insects and other arthropods. We will be focusing on the structures that make these invertebrate animals different from any vertebrate animals. These sessions will be offered in the late Spring. (LS.K.1, LS.K.2, LS.1.2.1, LS.2.1.1, LS.3.2.1, LS.3.2.2, LS.3.2.3)

### **SESSION 1: INVERTEBRATE...OR NOT?**

During this 20 minute online adventure, your naturalists will lead the session from one of our many Miami County Parks! We will identify what makes an invertebrate and invertebrate and not a...chair! There are thousands of living things out there that are invertebrates, living specially adapted to their environments. We will meet some of them and learn why they prefer living where they do. This session also has a tailored review quiz for your students and the No Bones SCIENCE JOURNEYS material will support some of the same standards. Click the session title above to book your session with a naturalist! (LS.K.1, LS.K.2, LS.1.2.1, LS.2.1.1, LS.3.2.1, LS.3.2.2, LS.3.2.3)

### **SESSION 2: LOOK AT ME!**

During this 20 minute online adventure, your naturalists will lead the session from one of our many Miami County Parks! In this adventure we will understand the benefits of camouflage and bright coloring patterns on invertebrates of all types. Why is it useful, and how does it help each species survive? This session also has a tailored review quiz for your students and the Heat & Pressure SCIENCE JOURNEYS material will support some of the same standards. Click the session title above to book your session with a naturalist! (LS.K.1, LS.K.2, LS.1.2.1, LS.3.2.1, LS.3.2.2, LS.3.2.3)
